Dear Ursula:

On behalf of the Inside Edge and its Board members, I wish to express our heartfelt appreciation to you for your presentation on August 22, 2012. Your presence fills up the room, and we were very enthusiastic about your message.

The process you gave us truly leads to great clarification and focus. It is surprising how much comes under the blanket of the "one great goal" when you start to put things aside. It has certainly brought me into alignment with the next step, and that is what makes your exercise so effective.

Although we don't often share the comment cards with our speakers, yours are so exceptional, I want you to have them. Please know that work you are doing is appreciated and very important to people of any age.

Love and blessings,
